

OUR COVER

PATEK PHILIPPE Nautilus 5711
 Launched in 2006 for the 30th anniversary of the Nautilus, this iconic "steel jumbo" version, reference 5711/1A, is directly inspired by the historical reference 3700 born in 1976. The basics are here: stainless steel octagonal case, two lateral hinges, an integrated bracelet, a mix of brushed and polished surfaces, a simple display on a grooved blue dial. But the new 3-part case has grown a bit to 43 mm and is equipped with a sapphire caseback, the hinges are slightly curved, the crown is larger and the bracelet has rather flat central links. The 5711 is equipped with a new automatic winding in-house movement calibre 324 SC (for seconde centrale or central second).
