

TITONI

MASTER SERIES

PROUDLY INDEPENDENT

Titoni is one of the few remaining independent family-owned watch companies in Switzerland. Three generations of the Schluep family have gone their own way for decades, and each of them has pursued a long-term vision to guarantee the company's stability and continuity.

At the heart of its philosophy stands its credo to produce Swiss-made mechanical watches of the highest quality at affordable prices. With almost a century of heritage, the company is fully dedicated to offering its clients first-class timepieces that live up to the company's high standards. Today, Titoni is proud to introduce its latest quality masterpiece: the Master Series 94688 S-ST-579.

This certified chronometer is Titoni's premium product. The watch with its classic and elegant design has been created for connoisseurs and watch-lovers alike. It combines simplicity with the fine art of Swiss watchmaking, a symbiosis for those who truly care about aesthetics and first-class craftsmanship.

The watch is presented in a 41.00 mm watch case and is equipped with a power reserve indicator at 6 o'clock and a big date window at 12 o'clock. With its fine bezel and sunray brushed dial, the timepiece reveals a refined look and a particularly bright appearance.

Classic indexes and elegant skeleton hands are both manufactured using a diamond-polishing technology. A combination that leads to a stunning reflection of light.

The Master Series is Titoni's premium collection. Each model bears the seal of the Official Swiss Chronometer Testing Institute (COSC). The latest addition to this collection is the Master Series 94688 S-ST-579.
