

# TRASER SWISS H3

## FUNCTIONAL WATCHES FOR SMART PEOPLE

The P67 Officer Pro Gun Metal "Lime" spectacularly reaffirms the brand's expertise in the field of self-activated illumination technology and purpose-built functional watches.

Beyond fashion and passing trends, Traser Swiss H3 watches are distinguished by their unique ability to assure constant visibility of the time display at a single glance, even in complete darkness and under poor visibility conditions, thanks to the in-house manufactured Trigalight® self-activated illumination technology.

Adding the Officer Pro Gun Metal Lime to its collection, Traser Swiss H3 continues this tradition in a spectacular way. This watch's tidily arranged dial provides the most reliably legible time display under all lighting conditions. By combining the 24/7 permanent glow of Trigalight® self-activated illumination with the progressively dimming luminosity of Superluminova, the dial begins an amazing metamorphosis as soon as ambient lighting fades. Entirely coated with lime-colored Superluminova, the watch face offers the perfect stage for 17 Trigalight® self-activated illumination tubes inserted in the hour markers, the hands, and beneath the logo.
