

DELMA

HERITAGE AUTOMATIC

THE CLASSIC TIMEPIECE FOR THE GENTLEMAN ADVENTURER

For almost a century, family-run Swiss watch company Delma has passionately designed and created an array of attractive and durable watches to rely on when it's time to perform. Keeping pace with Delma's long-standing collections of divers' and sports watches, the new Delma Heritage exemplifies a continued parallel focus on producing classic and sophisticated dress watches.

The new Heritage collection celebrates Delma's dedication to advancing the art of Swiss watchmaking as much as it serves as an accolade to the long-held traditions and values that characterise Delma's own heritage of building on areas of excellence to inspire future designs. At the intersection of tradition and originality, the Heritage steadfastly accompanies the gentleman adventurer on the path toward shaping a full and lasting legacy.

Reminiscent of Delma's earliest timepieces, elements such as the curved dial plus seconds hand, domed sapphire crystal and date indicator at 6 o'clock convince with their elegant simplicity. The luxurious sunray-brushed dial and slim applied indexes inside a lean 43mm case further define the character and elegance of this timepiece. The Heritage Automatic comes with Delma's customised ETA 2824 movement showcased beautifully behind a transparent case back.

Every glance at your Heritage will inspire you to build upon your own past successes to achieve great and noble things along the road of a meaningful life.

The sunray-brushed dial in bold brown tones lies encased beneath an elegantly domed and highly durable sapphire crystal. The round case in rose gold PVD further enhances the sophistication of this model. The fitted genuine leather strap, along with its folding buckle with two pushers to facilitate opening and closing the watch without the need for readjustment, completes the striking look of the Delma Heritage.
