

MUSE NATURAL BEAUTY

Since 2017, the new watch brand MUSE embodies, in timekeeping, some of the beauties of nature, with a philosophy based on the concept of "living in the present moment." The brand's mission is to provide another way of reading time: on its architectural models, time flows in constant motion. The new Kyrian timepiece is inspired by Celtic art and the "triskelion" motif. It is equipped with the MU-01 automatic movement. Customers can also choose to create their own watch with a personalised size or stone for the dial, colour for the case, or bracelet, as well as their own personal engraving if they wish.

YVAN MONNET THE PENTAGON RE-IMAGINED

The motivation of this Geneva watchmaker is to explore new geometries and rethink Swiss Made in order to offer unique and original luxury watches. His obsession with precision prompted him to develop a model whose aesthetics flirt with the quality of the components, 100% Swiss crafted. Patented design. www.ymonnet.ch
