

CZAPEK & CIE

EXPLORING NEW TERRITORIES

Czapek & Cie enters the sport-chic segment. The independent Swiss brand is unveiling the Antarctique line, a 40.5-millimetre three-hander combining a sophisticated style with the in-house- 30-millimetre SXH5.01 automatic calibre, featuring a free-sprung balance wheel and a micro-rotor made of fully recycled 18-karat gold. The edgy dial is crafted using a unique lamé technique: the characteristic striations give the colours more depth and starker reflections. The Terre Adélie model is a tribute to the French explorer Jules Dumont d'Urville. Its version with a "Secret Alloy" dial is limited to 99 pieces and will only be available through an online subscription until July 15th 2020.

HIGHLIGHT

ADRIATICA CONTEMPORARY TRADITION

Tradition is the key word for the Swiss watch brand Adriatica as its history goes back to the beginning of 20th century. The brand aims to combine a classic yet modern design with quality and accuracy, at a reasonable price. The Chronograph 8282.2217CH is the latest expression of this combination of tradition and technology. This model has been created for aficionados of elegant designs.
