

CARL F. BUCHERER

PATRAVI SCUBATEC

DEPTH AND STYLE

The latest ladies' diving watches by Carl F. Bucherer ooze confidence and style: the Patravi ScubaTec Lady is now available in a range of fashion-forward candy colours. As for the gentlemen's pieces, they present an eye-catching 44.6 mm case in blue and black or red and black.

Available in Palm Tree (green), Ocean (blue), Sand (rose-beige) and Sunset (coral), the new feminine additions to the Patravi ScubaTec family have an unmistakable summertime look. The Patravi ScubaTec Lady features the CFB 1950 automatic movement, which boasts 38 hours of power reserve and powers the hour, minute and second hands as well as the date positioned at 3 o'clock.

The 36.5 mm stainless steel case and protected screw-down crown give the watch an increased water resistance of up to 20 bar (200 m).

These colourful new additions to the Patravi ScubaTec family are in good company. The collection features many other sporty, elegant timepieces: ladies' models in steel or with a white rubber strap, for instance, and gentlemen's pieces with an eye-catching 44.6 mm case in blue and black or red and black. Each of these timekeepers is a striking combination of contemporary design and traditional Swiss watchmaking.

The new Scubatec Lady timepieces feature rubber straps in a choice of blue, green, beige and coral and boast a summery white wave pattern on the dial. Water resistance to 200m, a unidirectional rotating bezel in steel and ceramic and an automatic movement come together in the perfect package for all adventures both on land and under water.
