HISTORIADOR LANDERON

THE REVIVAL OF A 1946 CHRONOGRAPH

With the Historiador Landeron, the Swiss brand with Cuban roots has reinterpreted one of its historical chronographs, a model created in 1946 with a bi-compax layout and a Landeron 248 movement. The new reference in a 40mm stainless steel case is available with two dial options, each infused with Latin creativity: a black dial with contrasting silver-toned registers and a telemeter scale, or a white dial paired with blue hands and a blue tachymeter scale. The transparent case back provides a view of the fully restored Landeron 248 movement. A horological gem has come back to life! www.cuervoyobrinos.com
