

GRECO GENÈVE

LTM RACER TIME 002

A STRONG PERSONALITY

Greco Genève is expanding its sport-chic Swiss-made collection “Les Temps Modernes” with its first chronograph. The Racer Time’s unique design is defined by the characteristic nut shape, and carbon fibre. Robust, angular and monolithic, this automotive-inspired timepiece remains light and comfortable to wear thanks to its silicone strap and titanium case. The oscillating weight reveals the hallmark of the brand, fluorescence – a reaction created by pigments from the rare materials (used in banknotes to make them forgery-proof) which are also present on the folding buckle and the crown. Bold and original. www.greco-geneve.com
