# LOUIS MOINET

## AD ASTRA

### AN INTERGALACTIC JOURNEY

With the Ad Astra timepiece (Latin for 'to the stars'), we embark on one of those intergalactic journeys that Louis Moinet is uniquely qualified to create. This new experience is no less impressive than the independent brand's previous space expeditions. Here, a purple titanium spaceship, represented by an oversized tourbillon at 12 o'clock, and a blue planet in the form of an extraordinary 16-sided blue sapphire (3.92mm in diameter, with 208 facets) come to life in this unprecedented eight-piece limited edition. The two elements are suspended above a 1.8 mm opaque black titanium dial. Breathtaking. [www.louismoinet.com](http://www.louismoinet.com)
