

# TITONI

## IMPETUS

### THE TRUE ALL-ROUNDER

The watches in the Impetus series are true all-rounders: classy and for everyday use – stylish, yet robust. The series is created to give your day-to-day life a fresh impetus.

With the introduction of a striking new model, Titoni complements its long-standing and popular Impetus series. The minimalist aesthetics of this ergonomically designed mechanical timepiece makes it the perfect dress watch for daily business.

The visible highlight of this watch is the hobnail pattern, also called the *Clous de Paris*, in the inner circle of the dial. These finely engraved intersecting lines produce a very distinctive effect because they emphasise the truly classic look of this timepiece. The pattern makes the watch both sophisticated as well as playful. While smaller Roman numerals are set in the minute-track, two larger diamond-cut Roman indexes are applied at the 6 o'clock and 12 o'clock positions. The unique design of its multi-faceted round bezel lends further splendour to the watch and rounds off its chic look.

A thin automatic movement is set in the elegant and classy case. The transparent case back offers a view of the watch's beautiful movement. Titoni's name is carved into the gold-plated oscillating weight by laser-cutting techniques as a fine decorative element.

#### Impetus Series (Ref. 83751 S-632)

The new design comes with a smooth single-link bracelet. Its robust links are crafted with matt and polished finishes to not only give the bracelet a striking look, but also to enhance the overall streamlined appearance.
