

TITONI OF SWITZERLAND

MASTER SERIES

TRUE QUALITY TIME SINCE 1919

An essential element of Switzerland's culture is precision. Titoni truly takes Swiss values to heart: its timepieces have been hand-crafted in the in-house watchmaking atelier in Grenchen since 1919. The independent family-owned company is an internationally renowned watch brand amongst connoisseurs as well as ordinary watch lovers.

True quality time is what matters most to Titoni. It is an everyday challenge that the company not only sets itself through rigorous quality controls, but also upholds as a promise to its clients: the traditional Swiss company dedicates itself to producing precise quality timepieces for those who appreciate similar values.

Titoni is proud to present the next in line of its premium Master Series, a true expression of fine watchmaking created to delight those who appreciate exquisite design combined with great horological precision. This high-quality classic watch boasts a new design as well as a large diameter of 41.00 mm. The attractive timepiece is equipped with a power reserve indicator. The big date window adds another remarkable complication to this elegant watch. The striking representation of the date, with the digits displayed on two separate discs, adds a classic touch while ensuring that the date can be read more easily. Due to its fine bezel and enhanced diameter, the dial reveals a refined look. Available in silver and anthracite, it has a Sunray Brush that adds a discreet shine and an intriguing sparkle in the light.

Artfully fitted diamond-cut indexes and hands give this timepiece a particularly stylish appearance and their bright luminous filling allows the time to be easily read in the dark. The watch is available with an elegant stainless steel bracelet or a sleek leather strap in brown or black. Each Master Series timepiece bears the COSC seal and will be handed over together with a personal COSC certificate in an elegant wooden watch box.
