TITONI

SLENDERLINE

A SYMBIOSIS OF ELEGANCE AND COMFORT

Slenderline embodies the perfect combination of elegance and comfort. Its simplicity, enhanced by classic elements, is manifested in its ultra-thin design. The newest model in this series is powered by a mechanical movement.

With its delicate lines, the Slenderline gives its wearer a look of discreet elegance. The watch graces the wrist with its feather-light presence – a smart daily dress watch providing the ultimate in wearing comfort.

The outstanding feature of this classic mechanical watch is the red XII. The gently curved, needle-like hands paired with fine Roman numerals catch the eye. The specially designed slim case gives the watch a light, elegant appearance. The refined minute indexes on this two-hand watch make it easy to read the time, while highlighting its understated design.

The nine-link design of the stainless steel bracelet is extraordinarily supple. The thin, flexible bracelet smoothly embraces the wearer's wrist to ensure supreme wearing comfort.

Slenderline (Ref. 82718 S-608)
Recently, for the first time in the history of Titoni, the Slenderline has also been available as a mechanical watch. The red Roman numeral XII is the outstanding feature of this classical watch. The gently curved, needle-like hands paired with fine Roman numerals catch the eye beautifully.
