MASTER SERIES

THE FINE ART OF WATCHMAKING

The Master Series is the Grenchen-based family company's premium collection. Each model in this series bears the seal of the Official Swiss Chronometer Testing Institute (COSC). This watch has been created for connoisseurs and watch lovers alike.

With its classic and elegant design, Titoni's luxury chronometer combines simplicity with the fine art of Swiss watchmaking, a symbiosis for those who genuinely care about aesthetics and first-class craftsmanship.

The blue dial with its sunray-brushed finish is the watch's most distinctive feature, giving the timepiece a particularly lustrous appearance. The Super-LumiNova-filled indexes and hands are crafted using a diamond polishing technique, ensuring maximum light reflection and guaranteeing that the time remains perfectly legible, even in the dark. The delicacy of the exquisite skeleton hands reinforces the elegant allure of this timepiece.

A characteristic feature of the watch is the transparent case back, which offers a fascinating view of the rhodium-plated automatic movement. This "magic window" provides an aperture onto the delicate and highly decorative architecture of the watch.

The Master Series (Ref. 83188 S-661), with its slim bezel and sunray brushed dial, offers a refined and uniquely lustrous appearance. The solid butterfly clasp guarantees security, while the smooth stainless-steel bracelet offers unparalleled comfort in wear.
