P68 PATHFINDER GMT

THE PERFECT COMPANION FOR GLOBETROTTERS

The P68 Pathfinder GMT from Swiss watch pioneer traser is the ideal companion for anyone who has more than just one home. The new GMT watch with integrated compass ring not only shows the time in two different places, but also indicates the way – by day and by night.

The P68 Pathfinder GMT offers many of the popular extras of its predecessor the P68 Pathfinder Automatic, which has made a name for itself over the years as a must-have for all outdoor enthusiasts. However, the new model series also offers the remarkable GMT function: set the time at home plus another time zone and avoid annoying mental arithmetic or dragging your loved ones out of bed back home on your next long-haul trip.

And if you happen to lose your way during a snowstorm under a cloudless sky while hiking in Iceland, the reliable companion on your wrist will help you. Using the integrated compass ring, the position of the sun and the hour hand, you can easily find your way with the traser P68 Pathfinder GMT, even in the remotest places with no mobile phone reception.

If the sun has already set, the P68 Pathfinder GMT brings light into the darkness: the hands and indexes of the traser watch light up even in complete darkness thanks to the in-house developed trigalight self-powered illumination technology. This guarantees perfect readability of the time even at night and in poor visibility.
