

VOUTILAINEN

28SC

A PHILOSOPHY OF ELEGANCE

The Voutilainen 28SC wristwatch perfectly encapsulates Kari Voutilainen's philosophy. For the first time, the Vingt-8 movement incorporates a centre seconds function.

The Vingt-8 movement, a strong and elegant piece of engineering, is housed in a stylish and robust case which has been redesigned with concave lugs. The winding crown is also slimmer, with a broader diameter. The balance bridge is sublimely elegant, offering an unimpeded view of the escapement and balance. It also allows the enthusiast to admire the synchronised movements of the escapement wheels.

This new model comes in a 38.5 mm case, fabricated in-house in an initial 10-piece limited series in titanium and steel. It will be also available in precious metal (gold and platinum). Watch case is also fabricated in house.

The solid silver dial is engine-turned by hand. The hour markers are set against a basketweave pattern, while the centre features a 24-part sunburst motif. The dial is coloured with blue and silver galvanic surface treatments. The hour numerals are made from solid gold. The dial can be customised according to the customer's wishes.
