

# MONDAINE

## IT'S TIME FOR AN EVOLUTION!

Mondaine proudly presents the new SBB evo2 watch as a successor to the iconic EVO collection. It sticks with its success factors, being easy-to-read and true to the original, while optimising functionality and design at the same time, with its ergonomically designed watch case and lugs and its functionally designed crown.

Continuing this unification of the classical with the revolutionary, Mondaine has created a successor to the classic and revered Mondaine SBB evo - the Mondaine SBB evo2.

The new Mondaine SBB evo2 has been subtly refined for contemporary life. Its slightly rounded shape with an almost seamless transition to its case back has been ergonomically designed for ultimate comfort. Refined case lugs and a new functional crown sit in perfect proportion throughout the whole collection for precise balance.

The scratch resistant sapphire crystal ensures the new model hosts the highest technical and aesthetic quality. With the addition of a stainless steel mesh bracelet and leather strap, with visible black stitching on the IP black plated models, the collection is completed by the internationally revered 'Swiss Made' stamp of approval, which Mondaine wears with pride alongside its iconic status.

These intelligent updates are almost invisible, but the sum of its collective parts makes the evo2 a desirable contemporary range. It has been over 15 years since the original Mondaine SBB evo was introduced and Mondaine anticipates that the new line will continue its omnipresent position in the watch market.

Ergonomically designed watch case and lugs.  
Functionally designed crown.
