

## TITONI SPACE STAR

A classic tribute to the great tradition of Swiss watchmaking: this time, it comes with the small second hand on its dial (40mm) which stands out in classy silver opaline with artfully hand-fitted, diamond-cut indexes and hands. The sapphire glass slightly protrudes from the elegantly stainless steel bezel. The open caseback offers the fascinating view onto the automatic movement (ETA 2895-2) with its outstanding gold-plated oscillating weight.
